

# Joshua Stevenson

*Solutions Architect | AI & Cloud Infrastructure*

Nashville, TN | 615-440-8308 | joshua-stevenson@outlook.com | linkedin.com/in/stevensonjosh

---

## PROFESSIONAL SUMMARY

Solutions Architect with 18+ years of enterprise IT experience and specialization in Higher Education, Academic research, and SLED environments. Combines broad infrastructure expertise — cloud, HPC, storage, and AI-ready architecture — with hands-on Python development and a graduate-level foundation in analytics (MS, Georgia Institute of Technology) to design and optimize solutions for demanding, data-intensive workloads. Certified in Accelerated Data Science & AI Infrastructure and Operations, with working knowledge of GPU computing frameworks and accelerated computing platforms. Known for building trusted technical partnerships with university and research clients, translating complex scientific and institutional requirements into right-sized, high-performance solutions.

## CERTIFICATIONS & TECHNICAL SKILLS

---

### Certifications

- NVIDIA-Certified Associate: AI Infrastructure & Operations
- NVIDIA-Certified Professional: Accelerated Data Science
- Nutanix Certified Professional – Multicloud Infrastructure 6
- Nutanix Certified Professional – Artificial Intelligence

### Technical Proficiencies

- Programming: Python — applied ML, data pipelines, and demo application development.
- R & R Studio: Statistical Modeling and Research application.
- AI/ML: Model deployment, inferencing infrastructure, and AI-ready architecture design
- Accelerated Computing: GPU workload profiling, cluster sizing, parallel computing concepts, accelerated computing architecture
- Infrastructure: Hyperconverged, private/hybrid cloud, SAN, disaster recovery, high availability
- Containers & Orchestration: Kubernetes, containerized workloads
- Platforms: Nutanix Cloud Platform, VMware, Dell, HPE
- Data & Analytics: Graduate-level coursework in ML and computational methods (MS Analytics, Georgia Tech, in progress)

## PROFESSIONAL EXPERIENCE

---

### Nutanix

April 2023 – Present

*Sr. Systems Engineer* | Nashville, TN

Serve as technical partner to Higher Education, State & Local Government, and enterprise clients, architecting cloud platform strategies for performance, resilience, and AI-readiness.

- Develop Python-based sample applications to demonstrate platform capabilities to prospective clients, translating complex infrastructure concepts into tangible proof-of-concept deployments.
- Architect end-to-end solutions for university and research clients spanning AI infrastructure, cloud, storage, data protection, and compute-intensive workloads — applying knowledge of accelerated computing platforms to right-size environments for demanding research use cases.
- Leverage real-world telemetry and workload profiling to design appropriately scaled solutions, applying performance analysis methodology to match infrastructure to application requirements.
- Support Higher Education clients in evaluating AI-ready infrastructure strategies, including GPU-accelerated compute architecture and modern data platform integration.
- Enable client success in automation, disaster recovery, cost visibility, and high availability for mission-critical academic and research environments.

## **Dell Technologies**

June 2021 – February 2023

### **Sr. Solution Architect** | Nashville, TN

Pre-sales Solutions Architect for enterprise datacenter products — storage, server, cloud infrastructure, networking, and data protection — with focus on, Healthcare, Commercial, and SLED.

- Applied workload telemetry and performance profiling methodology to architect right-sized solutions for complex university and commercial enterprise environments.
- Designed end-to-end solutions for Datacenters, scoping infrastructure to support business critical workloads.

## **Dell Technologies**

April 2018 – June 2021

### **Sr. Systems Engineer** | Nashville, TN

Pre-sales Sr. Systems Engineer for healthcare and enterprise datacenter infrastructure.

- Supported a large multi-site hospital system as primary technical partner, scoping and designing infrastructure for high-availability, mission-critical clinical environments.
- Developed deep expertise in storage, compute, networking, and data protection solutions for complex, regulated workloads.

## **Hewlett Packard Enterprise**

November 2015 – April 2018

### **Enterprise Account Manager** | Nashville, TN

Managed commercial client relationships for HPE datacenter infrastructure: mission-critical compute, hyperconverged/SDx, private and hybrid cloud, networking, and storage.

- Drove data-driven investment planning using historical sales analysis and pipeline forecasting across key verticals including healthcare and pharmaceuticals.
- Orchestrated cross-functional territory resources and channel partner ecosystems to deliver technical and business outcomes.

## **Dell**

August 2014 – October 2015

### **Datacenter Specialist – Large Enterprise** | Nashville, TN

- Achieved 108% of \$22M annual quota supporting Large Enterprise, SLED, and institutional clients with pre-sales consultation, scoping, and infrastructure design.
- Specialized in PowerEdge servers, EqualLogic/Compellent storage, Force10 networking, and VMware virtualization.

## **Dell**

August 2012 – July 2014

### **Datacenter Specialist – Mid Market** | Nashville, TN

- Pre-sales specialist covering Datacenter Server, Storage, and Networking. Averaged 112% of \$10M annual quota; achieved 173% attainment in Q1 FY15.

## **Dell**

June 2008 – August 2012

### **Account Manager – Small Business & Consumer** | Nashville, TN

- Maintained 60% close rate (10% above team average); consistently performed in top 2–5% for single-day sales events.
- Created and delivered mobility product training materials adopted as floor-wide reference resources; named Customer Experience Ambassador Q4 2011.

## **EDUCATION**

---

### **Georgia Institute of Technology**

August 2022 – 2026

#### **Master of Science, Analytics (in progress)**

Master of Science in Analytics

Completing a rigorous, top-ranked interdisciplinary curriculum with a focus on machine learning, natural language processing, and statistical modeling. Gained hands-on expertise across the data lifecycle, utilizing Python, R and advanced simulation techniques to build scalable data pipelines and extract features from high-dimensional datasets. Applied theoretical frameworks to real-world enterprise challenges through a culminating practicum, developing a competitive install heat map and an interactive data platform to drive data-informed business decisions.

## **PUBLICATIONS, PROJECTS, & RESEARCH**

---

### Peer-Reviewed Publications

- Observational Study: Policy Impact on Student Infection Rates | *Journal of the Academy of Public Health* (2025)  
Citation: doi.org/10.70542/rcj-japh-art-4abgc4
- Risk-Benefit Analysis: BNT162b2 Associated Outcomes | *European Journal of Clinical Investigation* (2022)  
Citation: pubmed.ncbi.nlm.nih.gov/35156705/

### Projects:

- SLED Market Intelligence Platform – GaTech + Nutanix (April 2026)
- Nutanix AI DocAssist – Nutanix (May 2025)
- Predicting Pediatric ER Patient Volume – GaTech (December 2023)
- Encompass Workload Insights Pilot – Dell Technologies – (May 2019)

## **HONORS & AWARDS**

---

### Nutanix Excellence Awards (various)

Innovation Award – Dell Technologies April 2020 – Covid Hospital Dashboard

Innovation Award – Dell Technologies February 2019 – Asset Management Platform

Mary Catherine Strobel Volunteer Award Nominee – September 2020 (Uprise Nashville)

Frances Stubblefield Calculus I Award - MTSU

Dell Customer Experience Ambassador (Q4 2011)

Dell Award of Excellence (January 2010)
